

## **AOA - Live Show: Fear Factor Live, Universal Studios, Hollywood, CA**

In our media saturated world the expectation of the live audience constantly rises. Exposed to ever more spectacular effects, sensational events and outrageous stunts on television and in movies (all enhanced with the best selective editing and post production techniques), audiences come to live performances expecting to experience the same thing, live and in real time. Universal Studios Hollywood's Fear Factor Live show manages to fulfill those expectations through a masterful combination of live guest involvement, carefully planned "controlled risk" stunts, state of the art media enhancement blended together with clever stage direction and theatrics, and special effects. The show capitalizes on a very hot and current reality based TV show, successfully transforming it into an exciting live theatrical event.
