

The revolutionary wireless  
closed-captioning system  
for attractions, theaters, shows and beyond!

## Cutting-edge closed-captioning technology

inThrall uses the latest patented technology and augmented reality equipment to provide guests the ability to see dialog and descriptions of the action in front of them.

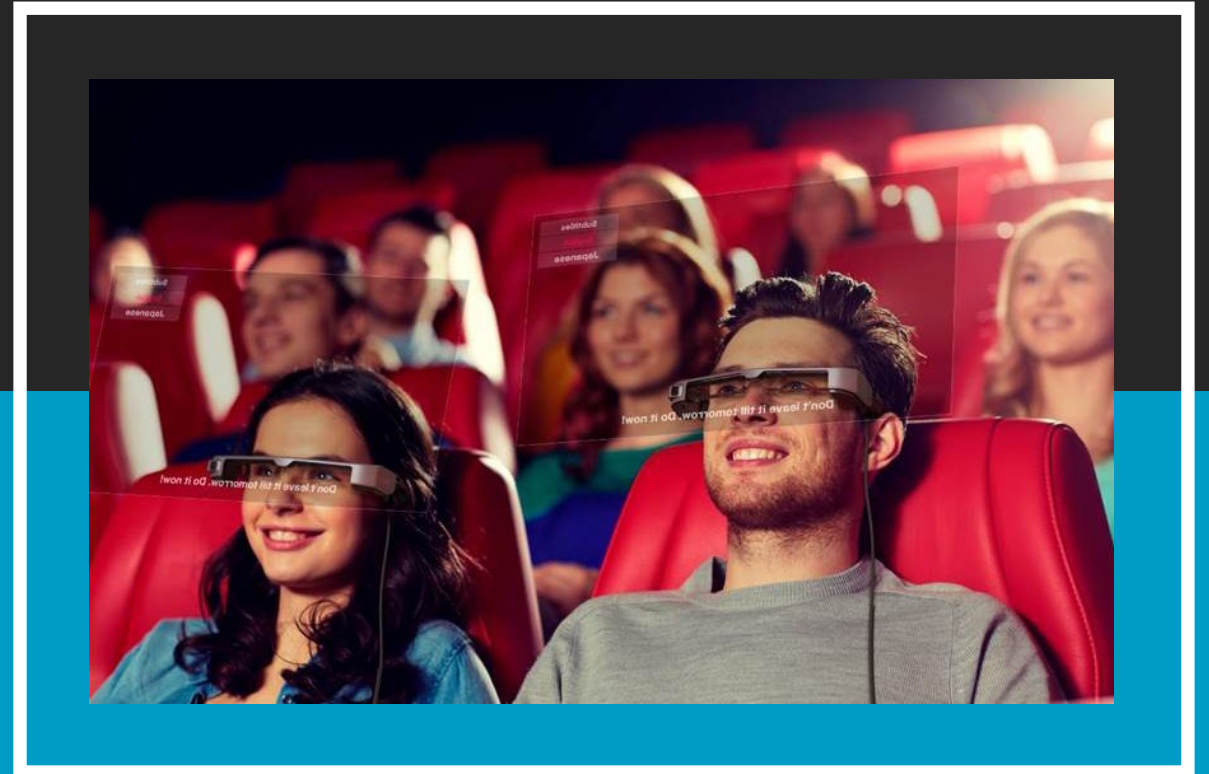

!!!NOTS !NWOD W0JS -  
[BOOB]

# Entertainment industry-focused

inThrall is designed for use in the entertainment industry to provide captions and subtitles and language translations on rides, shows, live action/recorded theaters and plays.

inThrall is scalable for any size facility.

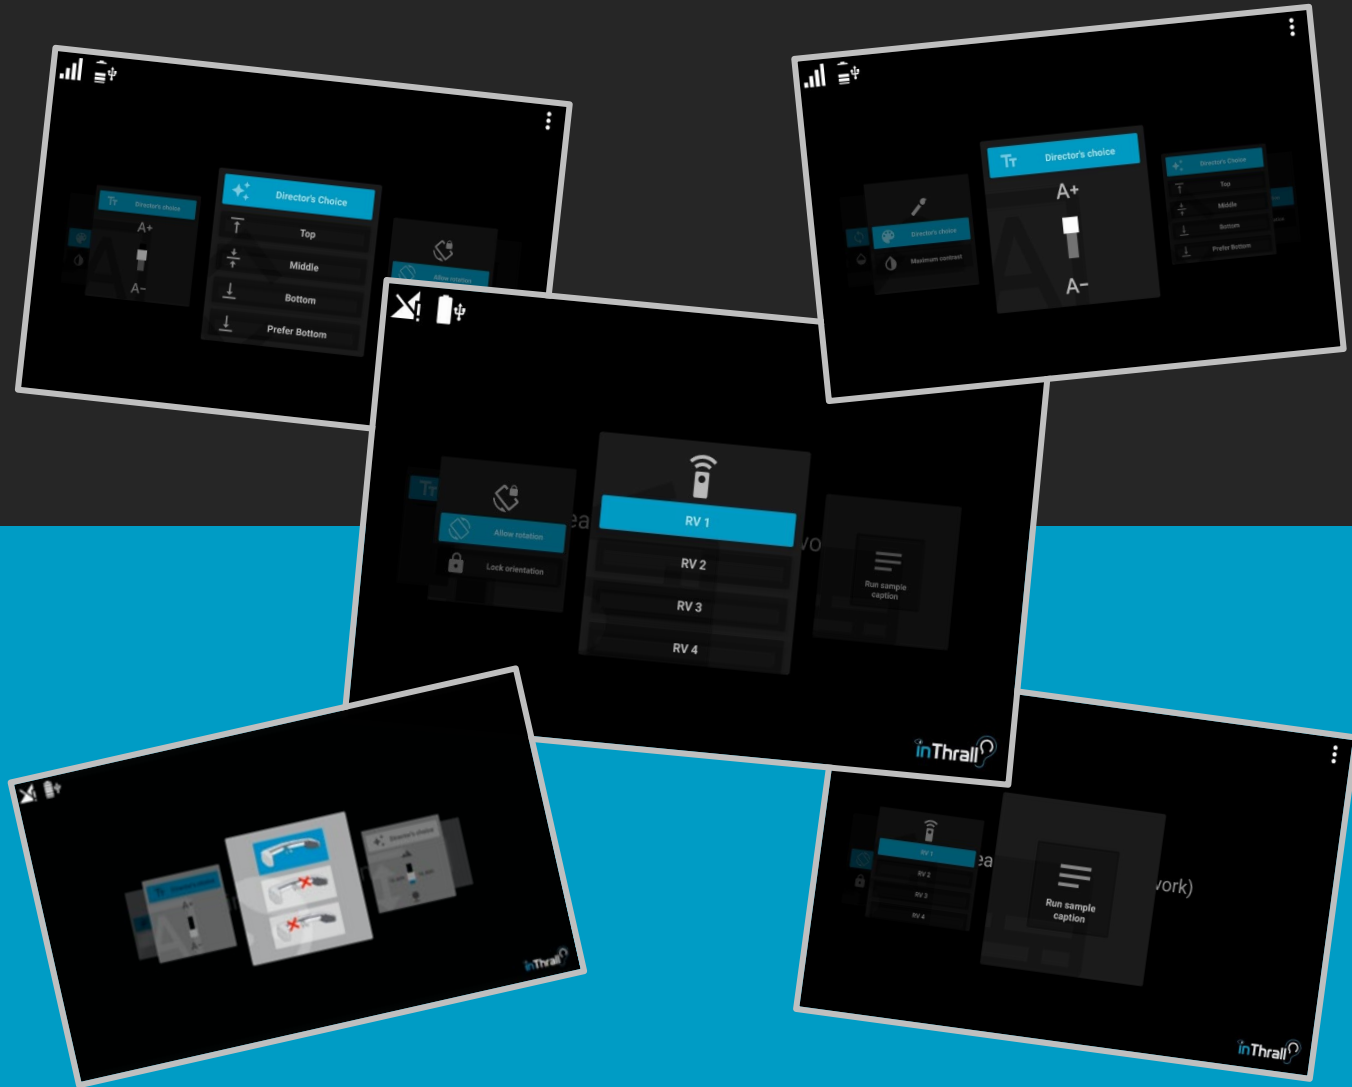

# inThrall App

inThrall mobile app  
is the heart and soul of the system

Years of development building and tuning  
including guest feedback

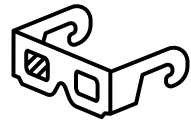

- Beacon selection and swapping algorithm
- Easy to use menu system
- Built-in deploy and test tools
- Detailed logging and debugging

## Two kinds of guest devices

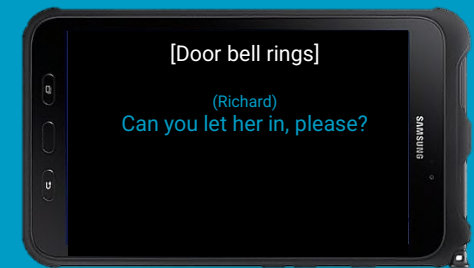

inThrall uses specialized EPSON series of AR glasses to display closed caption text information as an overlay.

3D shades accessory available!

Captions can be viewed on tablets  
hand-held or vehicle-mounted

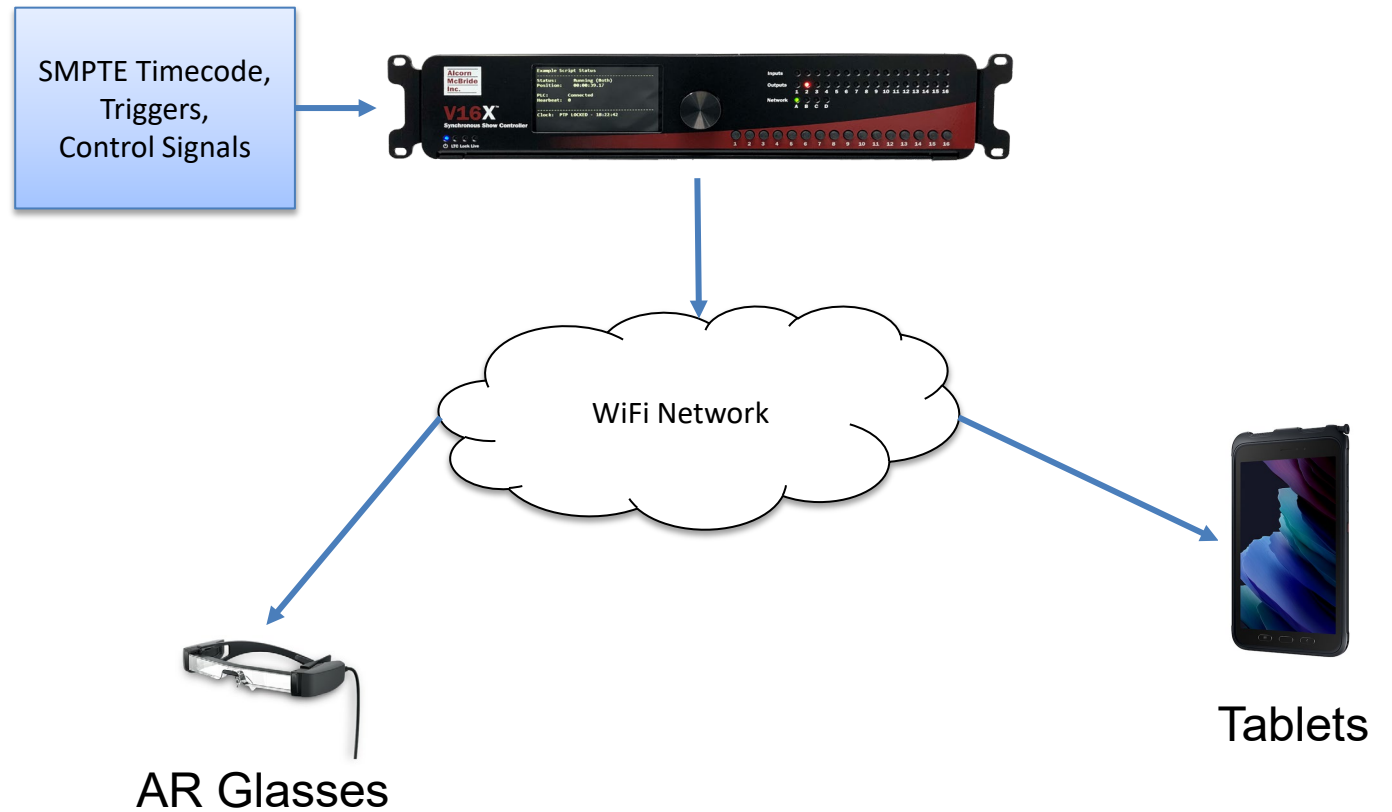

inThrall easily integrates with existing platforms and infrastructure.

V16X/Alcorn option leverages existing show maintainer knowledge and reduces training.

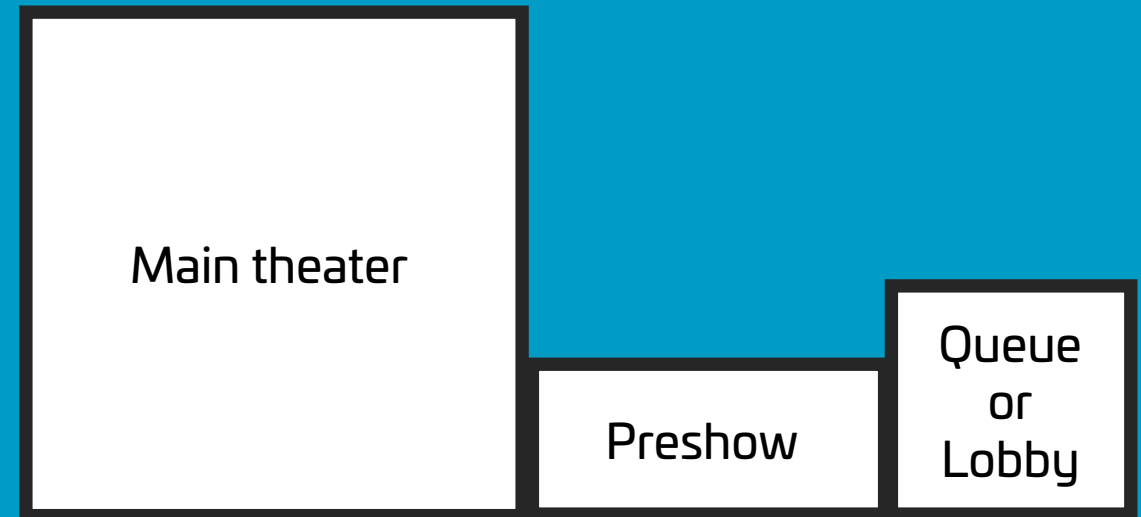

# System overview and Integration

# Location awareness

Small form-factor Low-Energy Bluetooth beacons (Content Locators) enable Guest Devices to be aware of their location and tune-in to location-based content and information.

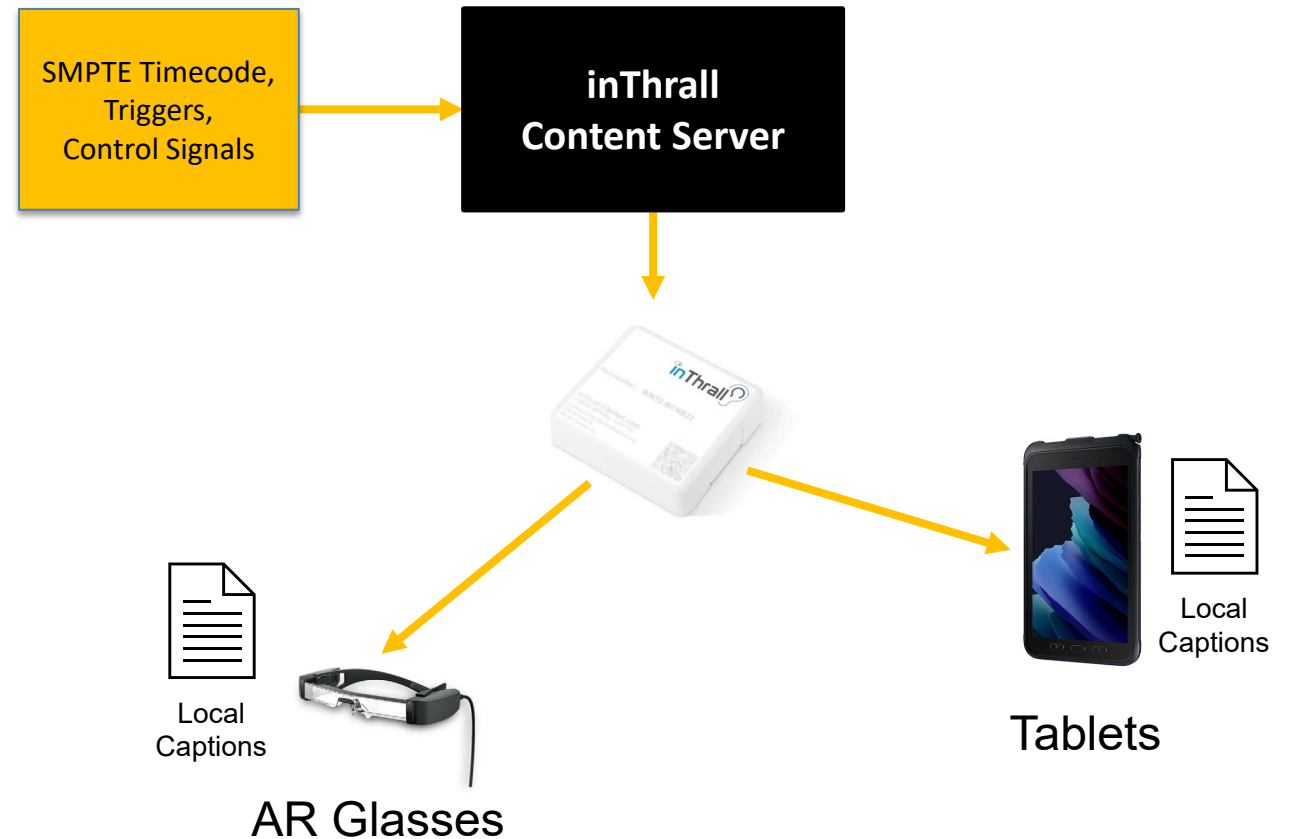

New Virtual Timecode delivery via Bluetooth Beacons.

- Connectionless
- No Guest Device Count Limits
- - No WiFi -

New!  
Virtual Timecode  
overview and Integration  
Captions stored in Devices

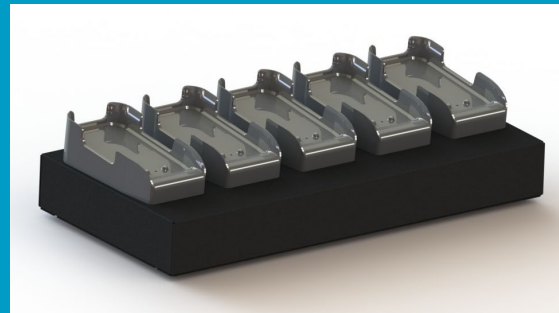

# Accessories and Options

Seamless Integration  
with Existing Show Equipment

Charging Station  
for AR Glasses

Charging Station  
for Tablets

Since 1984, award-winning Birket Engineering designs, assembles, installs, and commissions spectacular hardware and software for high-performance life-safety rides and show control systems for spectacular shows.

In the Orlando area since 1991, Birket engineers and managers also staff offices in Hong Kong and Shanghai.
